

Comfort and charm with an eye for the future

Take a break. Enjoy the conviviality, have a good chat, no rush and a breathtaking environment to discover. At Apollo Hotel Vinkeveen we do everything we can to make your stay a success and at the same time we try to burden nature and the environment as little as possible. With small measures we achieve a great effect, without this being at the expense of your comfort. We have received the Golden Green Key certificate for this.

Green Key is a well-known international quality mark for sustainable companies in the hotel and recreation industry. This label shows that we do everything we can to minimize the pressure of our company on nature and the environment. This takes us just a step further than normal laws and regulations requires.

The certificate has three levels: bronze, silver and gold. The more environmental measures a hotel has introduced, the higher the "environmentally friendly" level. We are proud to announce that we are in possession of the *golden* Green Key.

In practice

An important part of the Green Key certificate is that you, as a guest, are not hindered by the sustainable actions we take. And no, you are not expected to take nature and the environment into account continuously during the holidays. On the contrary: you may enjoy your holiday even more with the idea that you are working in an environmentally friendly way. At Apollo Hotel Vinkeveen we have found a strong balance between sustainable entrepreneurship and comfort.

We use environmentally friendly hand soaps and shampoos to energy-efficient devices. As for comfort? We use water sparingly, but in such a way that after a long day you can still enjoy a lovely, warm shower. All this promotes not only the feeling of comfort, but also the status of nature and the environment!
